Location: London, UK

SUMMARY Machine Learning Engineer / Data Scientist with 6 years experience in NLP, recommendation systems, and MLOps. PhD in Computer Science. Published 8 papers at top venues (NeurIPS, ICML, ACL). Built production ML systems serving 100M+ predictions/day.

SKILLS Languages: Python, SQL, R, Java, C++ ML/DL: PyTorch, TensorFlow, Hugging Face, scikit-learn, XGBoost, LightGBM NLP: Transformers, BERT, GPT, spaCy, NLTK, sentence-transformers MLOps: MLflow, Kubeflow, Airflow, Docker, Kubernetes, Prometheus, Grafana Data: Spark, Kafka, Redis, PostgreSQL, ClickHouse, Delta Lake Cloud: AWS (SageMaker, EMR, Lambda), GCP (Vertex AI, BigQuery)

EXPERIENCE DeepMind — Research Engineer (Sep 2021 – Present) London, UK • Developed large language model fine-tuning pipeline (7B params), 15% improvement on benchmarks • Built distributed training infrastructure on 128 GPUs, 3x throughput improvement • Designed evaluation framework for RLHF, adopted across 5 research teams • Published 3 papers at NeurIPS/ICML on efficient transformer training

Spotify — Senior ML Engineer (Jul 2018 – Aug 2021) Stockholm, Sweden (Remote from London) • Built real-time recommendation system serving 100M+ predictions/day, 12% CTR improvement • Designed feature store (Feast) for 500+ features across 20 teams • Implemented A/B testing platform for ML models, 200+ experiments/year • Migrated batch pipelines to streaming (Kafka + Flink), 90% latency reduction

EDUCATION University of Oxford PhD Computer Science (Natural Language Processing) 2014 – 2018 Thesis: “Efficient Transformer Architectures for Low-Resource Languages”

Imperial College London MSc Machine Learning, Distinction 2013 – 2014

PROJECTS LLM Fine-tuning Framework (Python, PyTorch, DeepSpeed) <https://github.com/marcusjohnson/llm-finetune> • LoRA/QLoRA implementation with multi-GPU support

Feature Store for RecSys (Python, Feast, Redis) <https://github.com/marcusjohnson/recsys-featurestore> • Low-latency feature serving for recommendation models

ACHIEVEMENTS • 8 papers at NeurIPS, ICML, ACL (3 first-author) • Google PhD Fellowship 2016 • Kaggle Grandmaster (Top 50 globally)
