Location: Pune, India

SUMMARY Recent Computer Science graduate with strong foundation in full-stack development. Internship experience at fintech startup building payment APIs. Eager to contribute to backend systems at scale. 200+ LeetCode problems solved.

SKILLS Languages: Java, Python, JavaScript, SQL, C++ Frameworks: Spring Boot, FastAPI, React, Node.js Databases: PostgreSQL, MySQL, MongoDB, Redis Tools: Git, Docker, GitHub Actions, IntelliJ, VS Code Cloud: AWS (EC2, RDS, Lambda, S3 - learning)

EXPERIENCE Razorpay — Backend Engineering Intern (Jan 2024 – Jun 2024) Bangalore, India • Built payment reconciliation API (Spring Boot, PostgreSQL) processing 10K+ transactions/day • Wrote 80+ unit/integration tests (JUnit, Mockito), 90% coverage • Optimized database queries, reduced p99 latency from 800ms → 120ms • Participated in on-call rotation, resolved 5 production incidents

Hackathon Project — UPI Fraud Detection (Aug 2023) • Team of 4, won 2nd place at Smart India Hackathon • ML model (XGBoost) detecting fraudulent UPI transactions, 94% accuracy • FastAPI backend with real-time inference (<50ms)

EDUCATION Indian Institute of Technology, Bombay B.Tech Computer Science and Engineering, CGPA: 8.9/10 2020 – 2024 Relevant Coursework: Distributed Systems, Database Systems, Operating Systems, ML

PROJECTS E-Commerce Backend (Java, Spring Boot, PostgreSQL) <https://github.com/priyasharma/ecommerce-backend> • REST API with JWT auth, order management, payment integration

Task Manager (Python, FastAPI, React, PostgreSQL) <https://github.com/priyasharma/task-manager> • Full-stack app with real-time updates via WebSockets

ACHIEVEMENTS • 200+ LeetCode problems (150 Medium, 30 Hard) • 2nd Place Smart India Hackathon 2023 • Google Women Techmakers Scholar 2023
